

QSL Managers Message

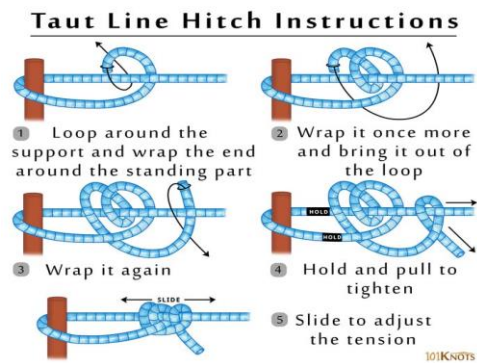

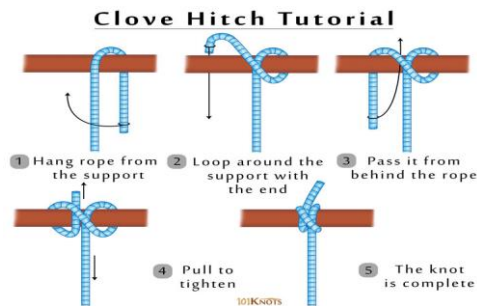

Winter Field Day is coming up at the end on the month, and we'll be setting up some antennas at Eisenhower State Park again this year. Time for a little review of some knots you should know how to tie to make setting up your antennas easier.

First of all...this is not a knot...

It's a mess. It might hold, but it will be very difficult to untie. (click here for more info)

Now for some knots you can actually use that are easy to tie, hold tight, and are easy to untie...

Feel free to contact me if you have any questions. I'll be available all day during Winter Field Day to help you tie some good knots.
